

STAIRGRIPPERS

BY HUMBLE MANUFACTURING CO. LTD.

HUMBLE STAIRGRIPPERS

Exterior wooden stairs and those made from the increasing popular composite materials are a common feature of many modern homes. These types of stairs have many benefits however they can become slippery due to rain, moss, algae and other weather elements.

DESIGNED TO IMPROVE TRACTION ON SLIPPERY STAIRS

Humble StairGrippers are attractive, durable and easy to install. Made from non-rusting aluminum with a measurement of 30" x 3.375" each of our Humble StairGrippers are predrilled and ready to install on most wooden and composite stairs. More durable than wire mesh or asphalt strips, StairGrippers provide improved traction for slippery stairs. Humble StairGrippers are an ideal solution for docks and ramps as well.

For more information, please contact info@humblemfg.com or visit www.humblemfg.com and follow us on Facebook
